- Intervention only – working with support in class but without SEND designation
- SEND on our register
- EHC Plan – Education Health Care Plan has replaced Statements

Please note that some children could be placed in a series of columns but in each case are placed in their main category, the figures in brackets show how they would also be designated.

In total we have 7 pupils on our register 3.4%, but I have also added the 29 children who are at intervention only. These children have in class and bespoke support and it is this provision which supports them and hopefully keeps these from being on the SEND register. Furthermore there are 19 children who work directly with Angela, our Learning Mentor and 16 children who work with Jane Rostance our Family Support Worker. It is their work which supports these children in various ways and stops them progressing onto our Special Needs list. Therefore our list is on those children who have a genuine special need.
